Title

Author

0.1 Abstract

English abstract of thesis. Should contain no abbreviations unless properly defined, and be self-consistent. Example: Einstein developed the theory of general relativity (GR). Now, GR can be used as an abbreviation.

0.2 Sammendrag

Norsk sammendrag av oppgaven. Det kan være vanskelig å oversette, så bruk god tid på å finne gode formuleringer.

0.3   Acknowledgements

Personal reflection and acknowledgments.

This is the one place in the thesis where you are supposed to be personal, so use it wisely.

Contents

0.4 History and Motivation

This is where you set the context for your thesis, by reviewing historic development in the field, and argue why the problem you want to solve is relevant. Typically a short review of references. Example: The book in ref. [AS10] is great, and the work of [TKNdN82, Tom50] is very nice.

0.5 Structure of Thesis

The introduction is in section 0.3. In chapter 1 you can see how a normal chapter looks like. At the end you can find appendices A and B.

Chapter 1

The First Chapter

This is a normal chapter [1]. Cleveref is nice, since the same command can be used to refer to chapters: chapter 1, equations: eq. (A.1), and sections: section 1.1 etc.

This is what a todo-note looks like inline

In thesis.sty, the suggestion-command is defined.

This is a suggestion note

1.1 Longer title that will not appear in table of contents

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla,

---

[1] and this is how a footnote appear.

malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

1.2   Some section

Appendix A

An appendix

Notice that the equation

$$H = \sum_k \epsilon_k c_k^\dagger c_k \qquad (A.1)$$

gets a "A".

Appendix B

Another appendix

$$H = \sum_k \epsilon_k c_k^\dagger c_k \qquad \text{(B.1)}$$

Here, the equation gets a "B".
